

The above information is to be used only for this email and no other. Xm has and is providing a valuable service in its programming which includes weather and traffic conditions. Since we pay for the service and the service is better prepared than local stations, I find and am getting angry that these other stations are limiting my rights to listen to what I want if it is provided by XM. If they, the members of NAOB, proceed to try to limit XM's programming, I pray that you will find them guilty and fine them for attempting to take my freedom away to listen to what I want. Please let us as a nation and you, a public agency, not make the same mistake as we did with not being able to get tv news from large metro stations 300 miles away. If I wanted to pay to receive those stations, I should have the freedom to do so. But even today, I can not get Denver Stations on cable which is over 300 miles away on the other side of the Rockies because of stupid laws brought forth by NAOB. All they want to do is create a situation where I am forced to listen to political ads they present while presenting the weather or traffic. I don't need to be forced (brain washed) to listen to political garbage in this coming election while I still need and want to listen to the news, weather, and traffic without being interrupted by political ads. Please tell them to get a life. James B Braden
